

## General reference

### GLOBAL CONFIGURATION CONSTANTS

- **DB\_TABLE\_PREFIX** → null
- **HTML\_BREADCRUMB\_SEPARATOR** → " » "
- **LANGUAGE\_FALLBACK\_LANG** → "en"
- **MAX\_BLOCK\_COMPLEXITY** → 84
- **MAX\_CYCLOMATIC\_COMPLEXITY** → 12
- **MAX\_METHODS\_COMPLEXITY** → 36
- **MD\_NEWLINE\_SEQUENCE** → "  
"
- **SET\_COMPLEXITY\_INDEX** → 12
- **SET\_GITHUB\_RAWPATH** → "https://raw.github.com/TheB3Rt0z/schrimp/master/"

### FUNCTION ALIASES

- **fe(\$path)** → .main.php on line 357, returns boolean if realpath path exists on running server; @param string \$path
- **fv(\$mixed)** → .lib/toolbox.php on line 29, returns a beautiful formatted value, mixed variable-type-dependant; @param mixed \$mixed
- **le(\$msg)** → .main.php on line 384, launches a customizable error 500, mit optional backtrace for debug; @param string \$msg
- **rt(\$url = "")** → .main.php on line 375, relocates to given relative url or to base path on default; @param string \$url
- **ru(\$uri = "")** → .main.php on line 366, returns an absolute uri, based on current server configuration; @param string \$uri
- **sb()** → .main.php on line 392, show call's backtrace with help of error base handler
- **tr(\$component, \$marker)** → .lib/language.php on line 90, executes language translation of marker identifier, referring to given component; @param string \$component @param string \$marker
- **vd(\$what)** → .main.php on line 348, returns pre-formatted mixed variables; @param mixed \$what

### TODOS

- **? admin bar** → optional control to measure run time performance (gApis)

---

## Class CONTROLLER (Thu, 29 Nov 2012 20:34:43 +0100)

### CLASS CONFIGURATION CONSTANTS:

- **VISIBLE\_IN\_NAVIGATION** → true
- **RENDER\_BREADCRUMB** → true

---

## Class DB (Mon, 26 Nov 2012 22:36:54 +0100)

---

## **Class ESCORT (Fri, 23 Nov 2012 21:07:16 +0100)**

---

## **Class HTML (Thu, 29 Nov 2012 22:10:43 +0100)**

---

## **Class LANGUAGE (Fri, 23 Nov 2012 21:07:16 +0100)**

### **TODOS**

- **automatic translation** → it could be interesting to use pspell&gettext
- 

## **Class MAIN (Tue, 04 Dec 2012 22:19:40 +0100)**

### **TODOS**

- **documentation** → PHP's highlight\_string/file to represent code excerpts
  - **escort library** → session su PHP poi DB se webstore & memcache fail?
  - **memcache support** → verify in method, if at least one mem-server works
  - **load\_libraries** → find some way to avoid conflicts between libs/plugins
- 

## **Class MD (Mon, 03 Dec 2012 22:49:42 +0100)**

---

## **Class NAVIGATOR (Tue, 04 Dec 2012 22:18:08 +0100)**

### **TODOS**

- **render\_list** → this should be CSS3 and appear on a mouse gesture..
  - **active breadcrumb** → dynamic same-level-select trunks, or maybe widget?
- 

## **Class POWER (Thu, 29 Nov 2012 20:34:43 +0100)**

---

## **Class TOOLBOX (Fri, 30 Nov 2012 23:50:38 +0100)**

---

## **Class WIDGETS (Fri, 23 Nov 2012 21:07:16 +0100)**

---

## **Available components:**

**ADMIN (THU, 22 NOV 2012 22:36:38 +0100)**

**CONTROL (MON, 03 DEC 2012 22:14:38 +0100)**

**DOCUMENTATION (THU, 29 NOV 2012 20:34:43 +0100)**

**ERROR (TUE, 04 DEC 2012 22:18:08 +0100)**

**HOMEPAGE (MON, 03 DEC 2012 21:19:41 +0100)**

**POWER (FRI, 23 NOV 2012 21:07:16 +0100)**
