

# Das S.C.H.R.I.M.P.'s Documentation

## 0.3.2013.01.18

### General reference

#### GLOBAL CONFIGURATION CONSTANTS

- **DB\_TABLE\_PREFIX** → null
- **HTML\_BREADCRUMB\_SEPARATOR** → " » "
- **LANGUAGE\_FALLBACK\_LANG** → "en"
- **MAX\_BLOCK\_COMPLEXITY** → 84
- **MAX\_CYCLOMATIC\_COMPLEXITY** → 12
- **MAX\_METHODS\_COMPLEXITY** → 36
- **MD\_NEWLINE\_SEQUENCE** → "  
"
- **SET\_COMPLEXITY\_INDEX** → 12
- **SET\_GITHUB\_RAWPATH** → "https://raw.githubusercontent.com/TheB3Rt0z/schrimp/master/"

#### FUNCTION ALIASES

- **fe(\$path)** → .main.php on line 371, returns boolean if realpath path exists on running server; @param string \$path
- **fv(\$mixed)** → .lib/toolbox.php on line 29, returns a beautiful formatted value, mixed variable-type-dependant; @param mixed \$mixed
- **le(\$msg)** → .main.php on line 398, launches a customizable error 500, mit optional backtrace for debug; @param string \$msg
- **rt(\$url = "")** → .main.php on line 389, relocates to given relative url or to base path on default; @param string \$url
- **ru(\$uri = "")** → .main.php on line 380, returns an absolute uri, based on current server configuration; @param string \$uri
- **sb()** → .main.php on line 406, show call's backtrace with help of error base handler
- **tr(\$component, \$marker)** → .lib/language.php on line 90, executes language translation of marker identifier, referring to given component; @param string \$component @param string \$marker
- **vd(\$what)** → .main.php on line 362, returns pre-formatted mixed variables; @param mixed \$what

#### TODOS

- **? admin bar** → optional control to measure run time performance (gApis)

---

## Class CONTROLLER (Thu, 29 Nov 2012 20:34:43 +0100)

#### CLASS CONFIGURATION CONSTANTS:

- **VISIBLE\_IN\_NAVIGATION** → true
  - **RENDER\_BREADCRUMB** → true
- 

## **Class DB (Mon, 26 Nov 2012 22:36:54 +0100)**

---

## **Class ESCORT (Fri, 23 Nov 2012 21:07:16 +0100)**

---

## **Class HTML (Wed, 16 Jan 2013 21:39:05 +0100)**

### **TODOS**

- **script online loading** → if != local, should have a lfb..
- 

## **Class LANGUAGE (Fri, 23 Nov 2012 21:07:16 +0100)**

### **TODOS**

- **automatic translation** → it could be interesting to use pspell&gettext
- 

## **Class MAIN (Fri, 18 Jan 2013 00:36:28 +0100)**

### **TODOS**

- **documentation** → PHP's highlight\_string/file to represent code excerpts
  - **escort library** → session su PHP poi DB se webstore & memcache fail?
  - **memcache support** → verify in method, if at least one mem-server works
  - **load\_libraries** → find someway to avoid conflicts between libs/plugins
  - **pdf documentation** → check file creation/modification date -> reminder
- 

## **Class MD (Mon, 03 Dec 2012 22:49:42 +0100)**

---

## **Class NAVIGATOR (Thu, 17 Jan 2013 23:38:48 +0100)**

### **TODOS**

- **render\_list** → this should be CSS3 and appear on a mouse gesture..

- **active breadcrumb** → dynamic same-level-select trunks, or maybe widget?

---

**Class POWER (Thu, 29 Nov 2012 20:34:43 +0100)**

---

**Class TOOLBOX (Fri, 30 Nov 2012 23:50:38 +0100)**

---

**Class WIDGETS (Fri, 23 Nov 2012 21:07:16 +0100)**

---

### **Available components:**

**ADMIN (FRI, 18 JAN 2013 00:38:07 +0100)**

**CONTROL (MON, 03 DEC 2012 22:14:38 +0100)**

**DOCUMENTATION (THU, 29 NOV 2012 20:34:43 +0100)**

**ERROR (FRI, 18 JAN 2013 00:37:50 +0100)**

**HOMEPAGE (MON, 03 DEC 2012 21:19:41 +0100)**

**POWER (FRI, 23 NOV 2012 21:07:16 +0100)**

---
